

## ARREST / JAIL MANAGEMENT SYSTEM

*Larimore's Arrest/Jail Management System is a complete system for managing everything from arrest to release.*

Ensure proper capture of critical information and get a robust suite of standard reports that allows you the data analysis you need.

### Streamlined entry process

- ◆ System walks officers through the entry process; greatly reduces errors and ensures that critical information is fully captured
- ◆ Full integration with Master Name System allows officers to quickly determine if arrestee's information has previously been entered
- ◆ When Master Name match is found, existing information is imported into arrest record with one mouse-click, and user can update information in the Master Name record
- ◆ Information can be exchanged on the fly with Incident System

### Thorough booking system, full transaction-tracking ability

- ◆ System allows officers to closely track property, vehicle, and transaction records
- ◆ Comprehensive tracking system allows supervisors to easily track when each transaction was logged and the officer involved

### Robust options for expanded functionality

- ◆ Can interface with Larimore UCR or NIBRS System; information that has been properly coded is automatically transferred to UCR or NIBRS System for simplified reporting
- ◆ Optional Photo Imaging System allows digital pictures of arrestees to be connected to arrest records for viewing and searching

### Fully functional spell-check system

- ◆ Narrative records include full spell-check functionality as well as ability to copy, cut and paste; text can be copied/pasted from other narrative records

### Find it quickly with streamlined search functions

- ◆ Search function is robust but easy to use; can search for elements within reports such as names, locations, incident classification codes, property items, and more

### Fully secure system

- ◆ Highly configurable security system allows users to limit access as needed
- ◆ System tracks names and times that report detailed were originally entered, edited, and deleted, as well as time a report was printed and by whom

### Full suite of powerful standard reports

- ◆ Booking/Arrest Forms: Medical, Property, Transaction Log
- ◆ Criminal History / Rap Sheet
- ◆ Officer Activity Log
- ◆ Arrest Log

### Optional custom reports

- ◆ Larimore can review your existing arrest report(s) and determine which report(s) can be written into the Larimore system so that the arrest data displays in the structure used by your department and as required by the prosecutor

*With its highly customizable structure and ease of use, Larimore's Arrest/Jail Management System is the right solution for any department.*
