

## COMPUTER AIDED DISPATCH - POLICE / FIRE / EMS

*Larimore's CAD System offers your dispatch center a unique combination of robust features and total flexibility.*

Based on more than 30 years of experience in public-safety software development, Larimore's CAD software provides the ultimate solution for your department or agency. In addition to being fully integrated with Larimore records-management systems, our CAD is highly customizable so that it fits perfectly with the way you work.

### Full-featured software that handles any situation

- ◆ Supports multi-agency, multi-jurisdictional dispatching
- ◆ Capable of dispatching Police, Fire, and EMS
- ◆ Call-taking and dispatching can be combined or separated
- ◆ Flexible system allows dispatchers to be assigned geographical areas, individual agencies, or a combination of both
- ◆ Unit recommendations based on call location, pre-plans, or both
- ◆ Robust, easy-to-use run-card system for rapid assignment of units; includes pre-plan move-ups and dynamic move-ups

### Built to interface

- ◆ Communicates with Mapping, E911, MDC, State/NCIC, and GPS
- ◆ Fully compatible with Phase II Wireless E911 signals
- ◆ Flexible SQL Server database format allows for interfacing to many external systems

### Fully integrated with RMS and Scheduling

- ◆ CAD data is transferred to Larimore Incident System seamlessly
- ◆ For Fire Departments, CAD data can also transfer to Larimore Enhanced NFIRS 5.0 with the push of a button
- ◆ Duty rosters can be built directly from Scheduling records – no need for dual-entry

### Flexible solution for multiple-premise departments

- ◆ Flexible, IP-based system allows for remote connections from multiple locations such as fire houses; can connect via wireless, thin-client system or T1 connection

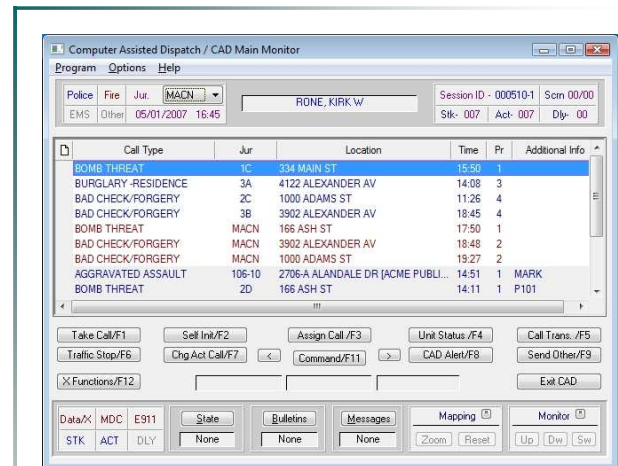

### Easy access to information to keep your personnel safe

- ◆ Previous call history, hazardous materials information, SOPs, patrol information, inspection information, hazards, permits, alarms, standpipes, utility shutoffs, knock boxes, run card recommendations, and support file information all available by location, and can be accessed as the call is being taken
- ◆ Name search allows dispatchers (and officers using MDC units) to search an individual's history

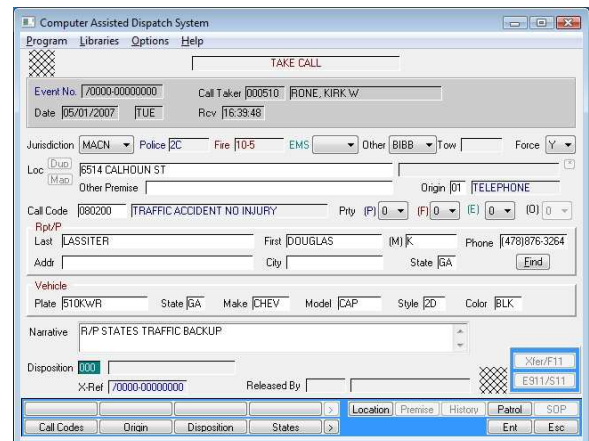

### Advanced functionality for advanced dispatchers

- ◆ Command-line function allows dispatcher to quickly assign units, assign additional transactions, change the duty roster, and more

*One of the pioneers in the CAD industry, Larimore continues to lead by focusing on innovation and reliability.*

### Powerful reports & analysis

- ◆ Full suite of standard reports allow you to easily manage a multitude of information requests
- ◆ Complete call abstracts
- ◆ Call analysis by time, date, officer, location, call code, and more
- ◆ Average response time reports
- ◆ CAD Call Review and CAD Search functions allow you to easily find individual records
