

## COMPUTER AIDED DISPATCH - FIRE / EMS

Larimore's CAD System offers your dispatch center a unique combination of robust features and total flexibility.

### Full-featured software that handles any situation

- ◆ Supports multi-agency, multi-jurisdictional dispatching
  - Expandable to allow dispatching of Police and Other agencies
- ◆ Call-taking and dispatching can be combined or separated
- ◆ Flexible system allows dispatchers to be assigned geographical areas, individual agencies, or a combination of both
- ◆ Robust, easy-to-use run-card system for rapid assignment of units; includes pre-plan move-ups and dynamic move-ups
- ◆ Fire Toneout feature, especially useful in volunteer departments, tracks the times when units are called but have not responded; system can be set with toneout reminders at intervals when units have not been assigned
- ◆ Dispatcher has access to all of the following: inspection information, hazards, permits, alarms, hazardous materials, standpipes, utility shutoffs, knox boxes, run card recommendations, previous call history, and support file information

### Built to interface

- ◆ Multiple interface capabilities – communicates readily with Mapping, E911, MDC's, GPS and others
- ◆ Fully compatible with Phase II Wireless E911 signals
- ◆ Flexible SQL Server database format allows for interfacing to many external systems, such as ProQA™ and more

### Fully integrated NFIRS and other RMS systems

- ◆ CAD data is seamlessly transferred to Larimore Enhanced NFIRS 5.0 System

### Flexible solution for multiple-premise departments

- ◆ Flexible, IP-based system allows for remote connections from multiple locations such as fire houses; can connect via wireless, thin-client system or T1 connection

### Advanced functionality for advanced dispatchers

- ◆ Command-line function allows dispatcher to quickly assign units, assign additional transactions, change the duty roster, and more
- ◆ CAD Alerts System allows time sensitive information to be entered as an alert and stored as a transaction to notify those working the call of the new information

### Configurable for your needs

- ◆ Larimore's unique Configuration program allows for system settings and security to be managed and controlled through one multi-function program
- ◆ Detailed Security program allows the administrator to easily manage rights within CAD for program and function access

One of the pioneers in the CAD industry, Larimore continues to lead by focusing on innovation and reliability.
