

COMPUTER AIDED DISPATCH - POLICE

Larimore's CAD System offers your dispatch center a unique combination of robust features and total flexibility.

Full-featured software that handles any situation

- ◆ Supports multi-agency, multi-jurisdictional dispatching
- ◆ Expandable to allow dispatching of Fire, EMS and Other agencies
- ◆ Call-taking and dispatching can be combined or separated
- ◆ Flexible system allows dispatchers to be assigned geographical areas, individual agencies, or a combination of both
- ◆ Unit recommendations based on call location, pre-plans, or both
- ◆ Previous call history, hazardous materials information, SOPs, and patrol information all available by location, and can be accessed as the call is being taken

Built to interface

- ◆ Multiple interface capabilities – communicates readily with Mapping, E911, MDC's, handhelds, State/NCIC, and GPS
- ◆ Fully compatible with Phase II Wireless E911 signals
- ◆ Flexible SQL Server database format allows for interfacing to many external systems

Fully integrated with RMS and Scheduling

- ◆ Data from CAD is transferred to Incident System seamlessly
- ◆ Duty rosters can be built directly from Scheduling records – no need for dual-entry

Flexible solution for multiple-premise departments

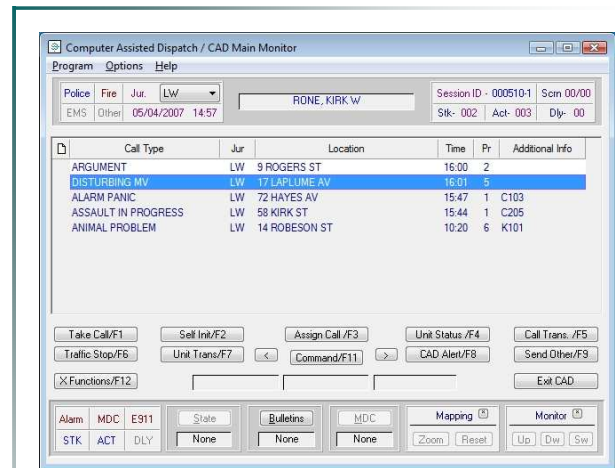

- ◆ Flexible, IP-based system allows for remote connections from multiple locations such as sub-stations; can connect via wireless, thin-client system or T1 connection

Advanced functionality for advanced dispatchers

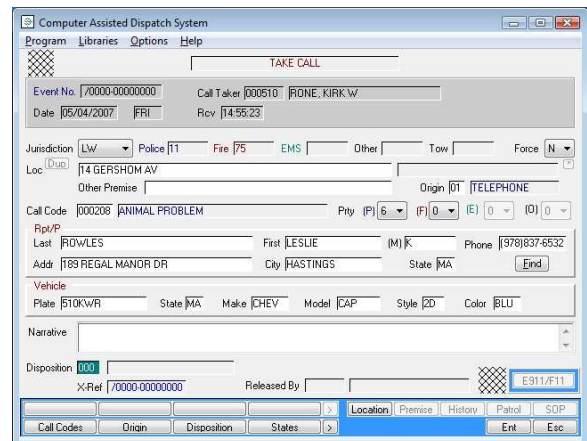

- ◆ Command-line function allows dispatcher to quickly assign units, assign additional transactions, change the duty roster, and more
- ◆ CAD Alerts System allows time sensitive information to be entered as an alert and stored as a transaction to notify those working the call of the new information

Configurable for your needs

- ◆ Larimore's unique Configuration program allows for system settings and security to be managed and controlled through one multi-function program
- ◆ Detailed Security program allows the administrator to easily manage rights within CAD for program and function access
- ◆ Call Codes are set up with characteristics to determine the typical procedure for handling that type of call, such as the priority of the call, associated SOP's, timeouts, etc.

CAD Main Monitor

Take Call Screen

Powerful reports & analysis

- ◆ Full suite of standard reports allow you to easily manage a multitude of information requests
- ◆ Complete call abstracts
- ◆ Call analysis by time, date, officer, location, call code, and more
- ◆ Average response time reports
- ◆ CAD Call Review and CAD Search functions allow you to easily find individual records

One of the pioneers in the CAD industry, Larimore continues to lead by focusing on innovation and reliability.
