

FIELD INTERVIEW SYSTEM

Replace the traditional card system with a more powerful, more accurate software solution.

Put the power of Larimore's customizable software to work for you – this Field Interview System allows you to accurately record and search for highly detailed interview records.

Robust system connects to master name/vehicle records

- ◆ Users can enter a vast array of information related to a field interview, including name, address, physical characteristics, location, date, time, vehicle information, and extensive narrative
- ◆ Name and vehicle entries connect to Larimore's Master Name and Master Vehicle Systems, allowing you to determine whether the person or vehicle has been encountered previously
- ◆ Narrative has fully functional spell-check system
- ◆ Field Interview records can be linked to multiple Incident System records
- ◆ Each Field Interview can be linked to as many as eight other Field Interview numbers, linking the interviews if they are related

Powerful search & reporting functions

- ◆ Easy-to-use searches allow users to find records based on date, interviewee, location of interview, vehicle, physical characteristics, case number, and more

***Managing field interview records has never been this easy.
