

## **FIRE INSPECTIONS / PERMITS**

*Larimore's Fire Inspection/Permits system automates and simplifies this process for Fire Departments.*

Put the power of Larimore's customizable software to work for you – this Fire Inspections/Permits System allows you to accurately record and search for inspection and permit records.

### **Robust system connects to premise records**

- ◆ Locations are validated through premise system with contact information
- ◆ View and update premise records through the inspection system and import premise data to the inspection system as needed

### **Enhance Fire Prevention through automation**

- ◆ Fire prevention inspections as well as company inspections are tracked through here
- ◆ Track code violations with associated fines, fees, and penalties
- ◆ Schedule the inspections for a specific date range and assign to a company or individual
- ◆ Access inspection history prior to next scheduled inspection
- ◆ Re-inspections are easily scheduled as needed to ensure code compliance
- ◆ Incorporates existing local and state forms and data elements
- ◆ Quickly check for existing permits through the permits record

***Managing fire inspection and permit records  
has never been this easy.***

***Contact us today for more information.***

### **Powerful search & reporting functions**

- ◆ Easy-to-use searches allow users to find records based on inspection types, premise types, and more
- ◆ Statistical reporting on inspections, violations, time spent and more
- ◆ Track trends to highlight how inspections are improving fire prevention

### **Timesaving options**

- ◆ Optional interface to notebooks, PDA, handhelds, or other remote device for use in the field—no more waiting to input the information back at the station
- ◆ Validation of fields for easy entry in a logical flow
