

INCIDENT / ACCIDENT REPORTING

Larimore's Incident System is the core element in its robust Records Management System, featuring intuitive data entry and a full suite of standard reports.

The Incident System can be fully integrated with Larimore CAD, Arrest, Case Management, and/or Property Tracking Systems for error-free transfer of data; or it can work as a stand alone system.

Powerful searches & reports, comprehensive data analysis

- ◆ Fully integrates with UCR or NIBRS System for accurate submission of data to your state
- ◆ Suite of standard management reports includes:
 - Incident analysis by time of day
 - Incident analysis by day of week
 - Analysis by geographic areas
- ◆ Larimore can review your existing incident report(s) and determine which can be programmed into the Larimore system so that the incident data displays in the structure used by your department and as required by the prosecutor
- ◆ Search function is robust but easy to use; can search for elements within reports such as names, locations, incident classification codes, property items, and more

Intuitive, error-reducing entry system

- ◆ System walks users through data entry, eliminating guesswork
- ◆ Administrator can build templates that streamline entry for common incident types such as accidents and domestic disputes
- ◆ System can be built to require data in selected fields; prevents incomplete reports

Fully functional spell-check system

- ◆ Narrative records include full spell-check functionality, ability to copy, cut and paste, and auto correct for common abbreviations

Automatically updates name/vehicle database

- ◆ Fully integrated with Master Name and Master Vehicle Systems, which automatically update based on Incident entry
- ◆ Information can be pulled from Master Name and Master Vehicle with a single button-push; reduces keystrokes

Fully secure system

- ◆ Highly configurable security system allows users to limit access

Interactive and flexible approval system

- ◆ Streamlined process makes report submission, correction, and approval effortless
- ◆ System tracks names and times for each record type as to when the records were originally entered, edited, and deleted, as well as time a report was printed and by whom

Thorough report-recording system allows you to record the following records:

- Report
- Incident
- Name
- Property
- Vehicle
- M.O.
- Narrative
- Accident
- Classification/Offense
- Bias
- Domestic Violence
- Officer Involvement

Larimore's Incident/Accident System offers an effortless entry process for officers and a powerful, yet flexible reporting system for administrators.
