

INTELLIGENCE SYSTEM

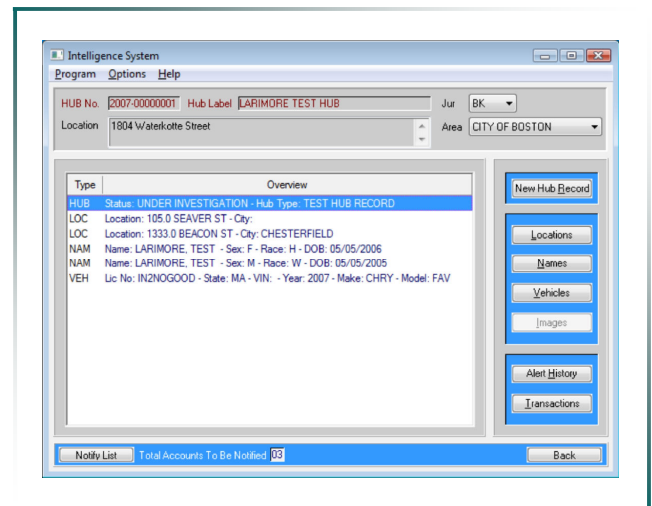

The Larimore Intelligence System provides vital communication links between key personnel and officers, dispatchers, etc.

Selected key personnel are contacted via cell phone, pager or email any time a specific Intelligence record (Name, Vehicle or Location) is identified elsewhere in an associated Larimore reporting application (CAD, Incident, Arrest or Field Interview). Coordination between supervisors, dispatchers and officers in the field is enhanced as the streamlined communication process brings about a greater exchange of information.

Immediate Notification: As Intelligence records are identified, the notification process can be routed quickly by cell phone, pager, or email.

Overview of Intelligence System:

- ◆ Any Name, Vehicle or Location of interest can be designated for Immediate Notification in the Intelligence System
- ◆ User defined Notification lists will contact selected personnel as Intelligence records are identified in other Larimore applications
- ◆ Notification process takes place according to a predetermined list of departmental personnel
- ◆ Intelligence System is coordinated with the Larimore CAD, Incident, Arrest and Field Interview systems and all other applications as needed
- ◆ Intelligence System will interface with any phone company protocol
- ◆ Pager E911 Interface is available nationwide with all phone service providers

When activated, the system brings together various aspects of the reporting process to increase the flow of information between all departmental personnel.
