

LINEUP SYSTEM

Larimore's advanced Lineup system integrates with our Booking and Photo Imaging systems to create a complete solution.

Detailed information about every mugshot taken is at your fingertips with this add-on component to the Larimore Arrest System.

Seamlessly integrated

- ◆ Can be added to the Larimore Arrest/Booking or Arrest/Jail Management system
- ◆ 'Repeat Offender' photos can all be viewed from within the person's Master Name Record, or individually within each corresponding arrest record
- ◆ Photos are automatically associated with matching Booking ID and Master Name Record, preventing mismatches and eliminating the need to manually link image files

Works with advanced photo equipment

- ◆ No simple shoot-and-scan system, the Larimore Photo Imaging System connects to advance photo equipment that takes high-quality images and automatically attaches them to the appropriate record

Flexible, detailed records

- ◆ System can be used to record images of tattoos, scars, and other identifying characteristics
- ◆ Information about each photo – location of characteristic, text description, etc. – can be easily recorded
- ◆ Users can zoom and pan images

Larimore's Photo Imaging System is a robust solution that allows your officers to easily take photos and accurately record detailed information about each one.
