

PAGER E911 INTERFACE

Larimore Associates Pager E911 interface will send immediate Pager notification to selected personnel, as determined by CAD Call Code properties. The Pager E911 Interface can be used in conjunction with a number of different protocols from telephone companies across the nation.

Selected Personnel are Notified

- ◆ Pager notification is completed as CAD calls are received according to a predetermined list of department personnel

Interface with Phone Company Protocol

- ◆ Larimore Associates can interface with all phone company protocols
- ◆ Pager E911 Interface is available nationwide with all phone service providers

Two Billing Options (Automatic or User Defined)

- ◆ Automatic - once the user accepts the call, the E911 information will prefill the appropriate fields
- ◆ User Determined - the dispatcher can accept call and then choose to accept the E911 information or disregard

Call Code Specified

- ◆ The CAD Call Code option can be activated to automatically engage the Pager E911 Interface whenever the Call Code is used
- ◆ Call Codes can be Pager E911 specified according to department policy

Pager E911 Log

- ◆ Preset history log of Pager E911 notifications can be used for search, history and reference purposes
- ◆ A complete log or modified report is available as needed
