

## PARKING TICKET SYSTEM

**Make sure your department is getting all the revenue it can – accurately track parking ticket records to ensure that unpaid tickets don't stay unpaid.**

Larimore Associates' Parking Ticket System is the ultimate solution for departments seeking an easy-to-use package that tracks tickets from entry to payment.

### Flexible, configurable system

- ◆ Each parking violation code can be associated with its own fine, and any fine can be changed when ordinances are changed – without affecting records entered prior to the new ordinance
- ◆ System allows for entry of partial as well as full payments
- ◆ System can be integrated with a cash drawer for collection of fines, as well as a receipt printer
- ◆ A separate Lessor file is available for leased vehicles

### Powerful reports ensure accuracy

- ◆ Quickly find which tickets are unpaid and overdue, and which drivers owe

### Suite of standard management reports include:

- Print Tickets for One Vehicle
- Violations Summary Report
- Citation Report
- Accounts Receivable
- Outstanding Violation By Owner
- Cash Receipts Journal
- Tow and Hold List
- Out of State Delinquent Report

**This system allows your department to automate the process of tracking and recording payments on tickets – saving time and ensuring that no revenue is lost.**

The image displays two screenshots of the Parking Management System software interface. The top screenshot shows the 'Parking Record' window for a ticket with details like Date (07/21/2003), Location (55 MUDDY RIVER), and Amounts (DUE: \$150.00). The bottom screenshot shows the 'Batch Entry' window for a new ticket with details like Date (01/01/2006), Location (12 BEACON ST), and Amount (Fine: \$15.00).
