

SARS (SITUATION ANALYSIS & RESPONSE SYSTEM)

Stay on top of a wide variety of special situations with this one-of-a-kind system from Larimore.

Create an accurate, detailed record of your department's response to unique situations.

Detailed records, insightful analysis

- ◆ Provides an efficient way for department personnel to identify trouble spots in your jurisdiction, such as suspected drug houses, locations with consistent excessive noise, locations where suspicious youths often gather, etc.
- ◆ System records the responses formulated by the department and tracks all activities, such as surveillance, undercover work, raids, etc.
- ◆ Response analysis and assessments can be applied to various tasks to make future assignments more effective

Flexible yet powerful security & searches

- ◆ Security limits access to the full record but can be set to allow individual officers to access and update their personal work records related to a situation response
- ◆ Searches can be done by a wide variety of parameters, allowing administrators to quickly and easily find the exact records, or types of records, for which they are searching

In today's environment, having the flexibility to track and analyze responses to ongoing situations is critical.
