

TRAINING SYSTEM

With training and certification requirements consistently increasing and becoming more complex, having an easy-to-use system to track your employees' training work is crucial.

Larimore's Training System allows you to easily track the training your employees have completed and quickly determine who is due for recertification.

Track all of your department's training

- ◆ System accepts unlimited number of training records
- ◆ Enter records by individual, or enter all trainees from a single course at the same time
- ◆ Multi-load feature allows administrators to pick names from a list of all personnel for easy entry

Robust features make administrative tasks simple

- ◆ Search and reporting features allow you to easily determine which employees are due for recertification and by when; report can be run by type of certification, by date, or by employee
- ◆ Courses can be entered into the system's library at any time; two-tiered library structure allows for easy organization of course types
- ◆ Powerful search functions allow for searches by employee, course, date, and more
