

Trespass / Warning system

Larimore's Trespass / Warning System enables any campus security department to accurately track all activities regarding the issuance and execution of trespass warnings or citations.

Link with Incident Reporting System

- ◆ Warnings can be created from the Trespass / Warning system independently or in conjunction with the Incident Reporting system
- ◆ As the warnings are issued, the Trespass / Warning record will be kept in the Trespass / Warning system and can be easily replicated in the Incident Reporting system

Verbal / Written Warnings

- ◆ Warnings can be Verbal or Written
- ◆ A complete record of all warnings is readily available and is maintained by the department
- ◆ Each entry in the log may contain the nature, date, time and general location of each occurrence along with the final disposition of the complaint

Warning Letters

- ◆ Each Trespass / Warning record can be accompanied by a standard letter from the department
- ◆ The letter can be produced at the time of the issuance or at a later date
- ◆ The contents of the standard letter are kept on file and can be edited or changed as needed
- ◆ A copy of the letter and the date issued are kept on record for each recipient

Photo log of violators

- ◆ Photos can be attached to the Trespass / Warning record
- ◆ Each photo can also be linked system-wide with the Incident Reporting system, the Arrest / Booking system, etc.
